

Qualitative Data Analysis using NVivo (WCQR)

Luís Manuel da Silva Martins¹

¹ Nvivo Certified Trainer, luismartins82@gmail.com;

Abstract: This workshop aims to provide a practical experience for participants interested in discovering new ways of analyzing qualitative data using the software NVivo. The workshop will provide an introduction to the software's features and capabilities, with a focus on hands-on learning through various activities and discussions. The objectives of the workshop are to provide participants with a general understanding of how to navigate and use NVivo for qualitative data analysis, as well as to provide participants with the opportunity to apply the concepts and tools learned to their own research. The expected results are that participants will leave the workshop with a better understanding of how to use NVivo for their own research projects and an increased ability to effectively analyze qualitative data.

Keywords: NVivo, qualitative data analysis, mixed methods.

Necessary resources: Good internet connection, headphones with microphone integrated to participate in the Q&A session.

Biographical note: Consultant and Trainer since 2012, with experience in scientific software for qualitative and quantitative data analysis.

Certified Trainer by QSR International.

Guest Lecturer at the Portuguese Catholic University (2017 - present) in the course unit of Qualitative Data Analysis in the Nursing Master's Degree courses.

Lecturer in Qualitative Data Analysis Methods in several Portuguese research centers, having recently collaborated with research centers of the University of Algarve, University of Aveiro, University of Beira Interior, Estoril School of Hotel Management and Tourism, Faculty of Social and Human Sciences of the Nova University of Lisbon, Faculty of Social and Human Sciences of the University of Beira Interior, among others.
